- Provides network support after hours and on weekends as necessary.
- Provides support assistance with trouble escalations for network division.
SUPERVISORY RESPONSIBILITIES

Functional and Technical Supervision - Regular responsibility for giving direction and guidance to employees as a lead worker, project manager or internal advisor. As an ongoing part of the position, the employee can expect to supervise between 1-10 employees.

FINANCIAL / BUDGETARY RESPONSIBILITY

Awareness of financial needs and deadlines to maintain, upgrade, and perform potential enhancements to system, as well as legal/regulatory licensing requirements, so recommendations can be made to management for budgeting and payment approval.

QUALIFICATIONS:
The requirements listed below are representative of the knowledge, skill, and/or ability required.*

EDUCATION

- Equivalent to a Bachelor’s degree from an accredited college or university with major course work in Information Technology or a closely related field.

EXPERIENCE

- Minimum of three years of networking and computer support experience.

CERTIFICATES, LICENSES, REGISTRATIONS

- Appropriate valid Texas driver's license, or the ability to obtain one, is required.
- Appropriate hardware and software certifications as required by specific job duties.

KNOWLEDGE OF

- Computers and Electronics: Electric circuit boards, processors, chips, and computer hardware and software.
- Customer Service: Principles and processes for providing customer and personal services including a desire to help customers regardless of their circumstance.
- English Language: The structure and content of the English language, including the meaning of words and grammar.
- Advanced Math: Mathematical calculations including geometry, trigonometry, algebra, statistics, and calculus.
- Computer Networks: Various hardware and software necessary to build a functional network, including routers, switches, firewalls, hubs, wiring, and how TCP/IP packets flow through the system.
- Programming Methodology: Necessary computer languages, basic principles, formulas, syntax, and documentation practices.
SKILLS AND ABILITIES IN

- Accuracy: Attention to detail in dealing with numbers, words, and ideas.
- Information Organization: Finding ways to structure or classify multiple pieces of information.
- Critical Thinking: Using logic and analysis to identify the strengths and weaknesses of different approaches.
- Reading Comprehension: Understanding written sentences and paragraphs in work-related documents.
- Service Orientation: Actively looking for ways to help people.
- Operations Analysis: Analyzing needs and product requirements to create a design.
- Active Learning: Working with new material or information to grasp its implications.
- Functional Supervision: Motivating, developing, and directing people as they work.
- Active Listening: Listening to what others are saying and asking questions as appropriate.
- Complex Problem Solving: Identifying problems and reviewing related information to develop and evaluate options and implement solutions.
- Cooperation: Establishing and maintaining positive working relationships with those contacted in the course of work.
- Written and Oral Expression: Communicating information and ideas in writing, as well as through speech, one-on-one or with groups, so others will understand.
- Database Development: Programming the indexing, storing, and retrieving of documents.
- Teaching: Conveying new concepts and confirming comprehension by listener.
- Deductive Reasoning: Applying general rules to specific problems to come up with logical answers. This involves deciding if an answer makes sense or provides a logical explanation for why a series of seemingly unrelated events occur together.
- Interactive Presentation: Effectively presenting information and responding to questions from groups of managers, clients, customers, and the general public.
- Speech Recognition: Identifying and understanding the speech of another person.
- Technical Reasoning: Interpreting an extensive variety of technical instructions in mathematical or diagram form.
- Problem Analysis: Identifying and defining problems, collecting data, establishing facts, and drawing valid conclusions.
- Self-Management: Working independently and without supervision.
