About Irving's Roll-Off Container Program

Whether you're planning a small bathroom remodel or a larger construction project, the City of Irving Solid Waste Services has a roll-off container that will fit your needs. Service includes the rental of a 12, 20 or 30 yard, open-top roll-off container.

A roll-off is a temporary container and is referred to as "roll-off" because the container itself is typically configured with small wheels, and the vehicle used to deliver and pick up the container uses a hoist and a tipping bed to roll the container on and off at each site.

Solid Waste Services will provide roll-off container service to a residential customer, with proof of a current City of Irving water account or to a commercial customer, business, church, governmental agency, or other entity, with proof of business status and location within the City of Irving.

When would you use a roll-off container?

Typically, a roll-off container would be used for waste from building construction, such as rocks, brick, broken concrete, lumber, building materials, or other trash resulting from construction or major remodeling or resulting from a general cleanup of vacant or improved property.

Suggested roll-off uses:

Residential

(recommended 12 or 20 yard roll-off)

- home remodeling projects
- neighborhood clean up
- large landscaping jobs
- move in/move out
- spring cleaning
- residential demolition

Commercial

(recommended 20 or 30 yard roll-off)

- office remodel
- store front build-out
- commercial demolition
- construction projects

Roll-Off Container Rental Tips:

A service agreement is required.

Fees are applicable.

Roll-Off trucks must have 50 feet of straight clear access to approach and engage the container.

All container sites must have minimum height clearance of 25 feet.

It is the customer's responsibility to provide an accessible location for the container.

Customers will assume responsibility for damage to or loss of the rented container(s).

Roll-Off Container Sizes:

12 Cubic Yard
7'4" W x 18' D x 30" H

20 Cubic Yard
7'4" W x 18' D x 48" H

30 Cubic Yard
7'4" W x 20' D x 66" H
